DD-3238

Hard Rock Drill System

Choose the EarthPro DD-3238 Hard Rock Drill System for faster performance in demanding conditions!

- Air-powered system delivers a volume of 650 to 700 cfm via a true high pressure system up to 350 psi
- Production rate is nearly double that of a traditional drilling system
- Three to six time faster than competitive air hammer systems due to increased air volume and a percussion rate greater than 2,200 beats per minute
- Only air hammer unit on the market to integrate with existing conventional controls
- Three-inch diameter hammer with a four-inch bit works with the DD-3238's existing pipe -- there's no need for special pipe
- Can be used as a traditional drill when conditions aren't as demanding.
- 32,000 lb Thrust/Pullback force
- 3,800 ft-lbs. of rotary torque
- Dual Rack & Pinion Carriage Drive
- Single Multi-function joystick controls
- State-of-the-art rod loading capabilities!
